# Overview; {

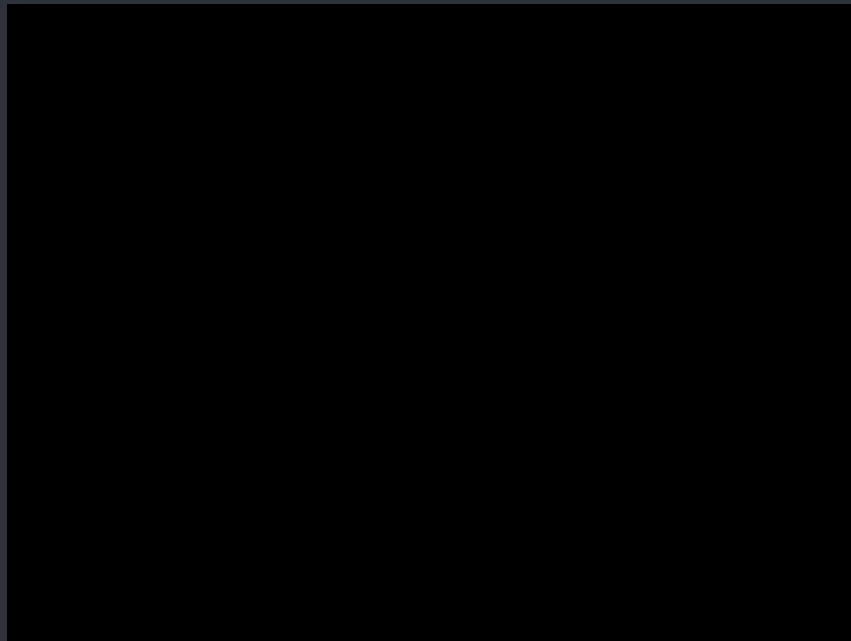

'Consciousness → Multimedia Experience'

<p Speak anything that's on your mind right now, and we'll turn it into a film with music, lyrics, and images put together >

</p>

## Challenges:

- \* Generate music with lyrics
- \* Maintain long-term coherency in music
- \* Inference latency

< /2 >

- \* Although we do not directly re-use results from previous projects, they laid out a good foundation and helped us prepare for this project.

}
